PROFESSIONAL SUMMARY

I encourage you to visit my dashboards and projects through the website link above. I am a data-driven professional with a strong foundation in Business Administration and Data Analytics, complemented by a lifelong passion for aviation fueled by family connections to the industry. Proficient in SQL, Python, R, and Tableau, I am experienced in extracting insights from complex datasets, creating impactful visualizations and dashboards, and communicating findings to stakeholders. I am seeking to leverage my diverse background to excel as a Data Analyst.

EDUCATION

Bachelor of Science (B.Sc.) in Business Administration

Corvinus University of Budapest

2017 - 2021 Budapest, Hungary

Data Analytics coding bootcamp

Ironhack

2024 - 2024 Lisbon, Portugal

WORK EXPERIENCE

Data Analyst

International Committee of the Red Cross

06/2022 - Present Geneva, Switzerland

- Utilized SQL to extract, clean, and analyze data related to the Ukrainian-Russian armed conflict, supporting tracing and family reunification efforts.
- Created data visualizations, dashboards and reports communicating and presenting trends and insights to stakeholders, facilitating informed decision-making and improving coordination across international teams.
- Implemented data quality control measures, reducing errors by 30% and improving overall data reliability for a CRM database of 20,000 individuals and over 500,000 records.
- Standardize data processes, enhancing global coordination and reporting accuracy.
- Collaborate with international Red Cross organizations to share data insights, improving coordination across different countries and teams.
- Develop and maintain interactive dashboards to track key metrics related to missing persons, enhancing real-time situation awareness.

Real Estate Operations Analyst

Julian & Co Managing Partners

05/2021 - 05/2022 Budapest, Hungary

- Implemented revenue management strategies for Airbnb properties, optimizing flexible pricing systems to maximize occupancy and revenue, resulting in a 20% increase in overall profitability.
- Created reports to monitor key performance indicators (KPIs), enhancing operational visibility by 10%.
- Implemented and managed a property management system for over 100 properties, increasing operational efficiency by 25%.
- Conducted exploratory data analysis on occupancy rates, pricing trends, and guest feedback, leading to a 15% increase in revenue per available apartment.
- Developed a centralized database for guest information, maintenance schedules, and financial records, improving data accessibility and decision-making processes.
